

Workshops and Services Available on the EASYProcess Workflow Canvas

Workshop Grouping	Service Name	Description
Authentication	AddToSession	Add User To Session
	IsLoggedIn	Is Logged In
	Login	Login
	ModifyUserSession	Modify User Session
	RemoveFromSession	Remove User From Session (Logout)
Command Line	Run	Run Command
Date / Time	AddDuration	Add Duration To Date
	ConvertFromJDEDate	Convert From JDE Date
	ConvertToJDEDate	Convert To JDE Date
	GetCurrentDateTime	Get Current Date Time
	Subtract	Subtract one date from another
DataBase	Delete	Delete Database Record(s)
	ExecuteUpdate	Run Insert/Update/Delete SQL Command
	GetGridData	Get Grid Data
	GetTableColumns	Get Table Columns
	GetTableNames	Get Table Names
	Inquire	Inquire From A Database Table
	Insert	Insert Record to A Database Table
	Read	Read Sequentially From Database
	RunQuery	Run An Inquiry/Select SQL Query
	SaveBinaryToFile	Save Binary To File
	Update	Update A Record in A Database Table
Email	ReceiveEmail	Receive Email Messages (Using POP3)
	SendEmail	Send Email messages (Using SMTP)
	SendWebPartEmail	Send Email Using A Web Part
Emulator	CheckSession	Check If Session Exists
	ConnectSession	Connect To An Existing Session
	DisconnectSession	Disconnect From An Existing Session
	GetData	Get Data
	ReceiveFile	Receive File
	StartSession	Start A New Session
	StopSession	Stop A Session
Encryption	Decrypt	Decrypt input data
	Encrypt	Encrypt input data
Entity	AddHierarchy	Add Hierarchy
	Copy	Copy
	Create	Create
	Delete	Delete
	GetDeployedEntity	Get Deployed Entity
	GetDeployedEntityByName	Get Deployed Entity By Name
	GetNextChild	Get Next Child In Hierarchy
	GetNextNumber	Get Next Number
	GetParent	Get Parent In Hierarchy
	GetPreviousChild	Get Previous Child In Hierarchy
	Load	Load An Entity
	MoveHierarchyDown	Move Hierarchy Down/Right
	MoveHierarchyUp	Move Hierarchy Up/Left
	RemoveHierarchy	Remove Hierarchy
	Update	Update
Evaluator	ConvertRTFToText	Convert RTF To Text
	Evaluate	Evaluate Using Expressions
	GetMD5Value	Get tMD5 Value
	Split	Split A String Using Separator

Workshop Grouping	Service Name	Description
Exchange	GetAllMessages	Get All Messages
	GetMessageAttachments	Get Message Attachments
	GetNewMessages	Get New Messages
	SaveAttachment	Save Attachment To Disk
File System	AppendFile	Append To An Existing File
	CopyFile	Copy File
	CreateDirectory	Create Directory
	DeleteDirectory	Delete Directory
	DeleteFile	Delete File
	DirectoryExists	Check If Directory Exists
	FileExists	File Exists
	GetDirectories	Get Directories
	GetFiles	Get Files In A Directory
	MoveFile	Move File
	ReadAllLines	Read All Lines From A File
	ReadFile	Read File
	WriteFile	Write To File
FTP	Receive	FTP Receive
	Send	FTP Send
General Utility	GetRandomNumber	Get Random Number
	GetSystemEnvironmentVariable	Get Environment Variables
	GetSystemVariables	Get System Variables
	Sleep	Sleep For Specified Milliseconds
	ThrowServiceExecutionException	Throw A Service Exception
HTML	AddCookie	Add New Cookie
	AddToSession	Add Variable To Session
	ClearList	Clear List
	CloseWindow	Close Window
	ConfirmWindow	Confirm Window
	Forward	Forward
	ForwardToPageUrl	Forward To Same Page
	ForwardToWindow	Forward To Window
	GetCookie	Get Cookie Value
	GetRequestAttributes	Get Request Attributes
	GetRequestVariable	Get Request Variable
	GetServerAttributes	Get Server Attributes
	GetUploadedFileInfo	Get Uploaded File Info
	HttpPost	Http Post
	RegisterJavaScript	Register JavaScript In A Page
	ReloadAllWebPartsInPage	Reload All Web Part In A Page
	ReloadList	Reload List
	ReloadParentWebPart	Reload Parent Web Part
	ReloadWebPart	Reload Web Part
	RemoveCookie	Remove a Cookie
	RemoveFromSession	Remove From Session
	RetrieveFromSession	Retrieve From Session
	SaveUploadedFile	Save Uploaded File To Server
	SelectItemInList	Select An Item In List
	SetAjaxUpdateProgress	Set AJAX Update Progress
	SetControlAttribute	Set Control Attribute
	SetControlEntityProperty	Set Control Entity Property
	SetControlProperty	Set Control Property
	SetValue	Set Text To A Web Field
	SetValueInList	Add Item to List
	SetWindowAttributes	Set Window Attributes
	UrlDecode	Url Decode
	UrlEncode	Url Encode

Workshop Grouping	Service Name	Description
HTTP	Get	HTTP Get
	Post	HTTP Post
Iseries Emulator	CheckSession	Check Session
	ReceiveFile	Receive File
	SendCommand	Send ISeries Command
	SendData	Send Data
	StartSession	Start Session
	StopSession	Stop Session
ISeries	CommandCall	Command Call
	ConnectSession	Connect Session
	DisconnectSession	Disconnect Session
	GetData	Get Data
	ProgramCall	Program Call
JD Edwards DB	SendData	Send Data
	Delete	Delete database record(s)
	ExecuteUpdate	Execute a SQL command
	GetGridData	Get Grid Data
	GetTableMetadata	Get a database table meta data information.
	Inquire	Get record(s) from database
	Insert	Add new database record
	RunQuery	Run a inquiry sol query
JDE EnterpriseOne	Update	Update database record
	CallBSFN	Call BSFN
	GetBSFNOutput	Get BSFN Output
	GetBSFNTemplate	Get BSFN Template
Message	GetMessage	Get Message
MSMQ	Receive	Receive
	Send	Send
MSSQL	Delete	Delete
	Email	Email
	ExecuteUpdate	Execute Update
	GetDBCColumns	Get DB Columns
	Inquire	Inquire
	Insert	Insert
	Update	Update
PDF	HtmlStringToPDFFile	Convert Html String To PDF File
	HtmlStringToPDFPage	Convert Html String To PDF Page
	HtmlStringToPDFWindow	Send Html String To PDF Window
ProcessFlow	BinaryDecision	Binary/Boolean Decision
	EndForEach	End Loop
	ForEach	Start Loop
	Merge	Merge
	OutputFormatter	Output Formatter
	ReturnMessage	Return Message
	Start	Start
Process	Terminate	Terminate
	Call	Call
	ExecuteAfterConfirmResponse	Execute After Confirm Response

Workshop Grouping	Service Name	Description
Reflection	GetAllMethods	Get all methods in a type
	GetAllProperties	Get all properties for a type
	GetAllTypes	Get all types in an assembly file
	GetEnumValues	Get Enum Values
	GetMethodsArguments	Get all arguments (parameter) of a method
	GetProperty	Get property by name
	InvokeMethod	Invoke .NET Method
	LoadAssembly	Load a given assembly by name/path
Regular Expression	Parse	Parse
Socket	Connect	Connect to a socket
	Receive	Receive Data
	Send	Send data
	SetSocketOption	Set socket options
Subscription	GetPublicationDetails	Get Publication Details
	IsValid	Is Valid
Template	ServiceName	Service Name
VeriSign	Authorize	Authorize
	Credit	Credit
	DelayedCapture	Delayed Capture
	Sale	Sale
	Void	Void
WebPart	GetHtmlString	Get Html String
	SetDataSourceFilterProperties	Set Filter Property
	SetDataSourceProperties	Set Data Source Property
	SetSectionFieldProperties	Set Field Property
	SetSectionProperties	Set Section Property
WebService	Invoke	Invoke
	StartWork	Start Work
Windows Services	Continue	Continue
	Pause	Pause
	Start	Start
	Stop	Stop
Base	ShutDown	Shut down
	StackRecall	Stack Recall
XML	BeautifyXml	Beautify Xml
	LoadFromFile	Load Xml From File
	LoadFromString	Load Xml From String Data
